

T.P.N/C.V.P. . Catalog #'s 923/16/17/18

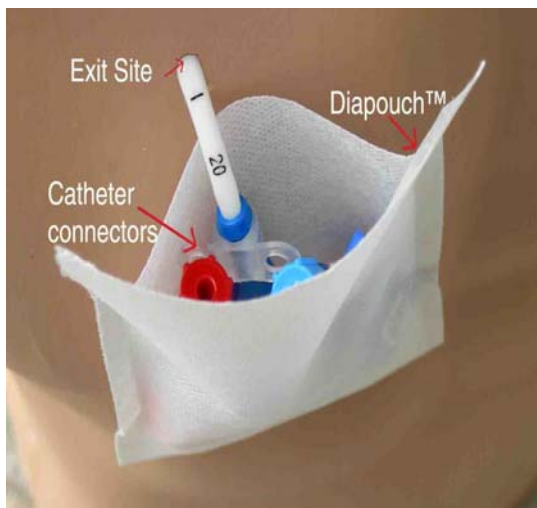

Hyperalimentation Dressing Trays for Dialysis, Nutrition and Chemotherapy Using Catheter.

Provides all the components for a safe, contamination-free Hyperalimentation and central Venous procedure.

Specially designed sterile trays for optimum aseptic methodical treatment in specific procedures such as total paraenteral nutrition.

The tray contains "ON & OFF" procedure packs. Separate peel-pack for connection and post use.

"Post" pack includes **Silvalpad™** Antibacterial Dressing for posterior use to be applied around the exit-site. Catheter ends are placed in the **Diapouch™**, all in a water repellent system that prevents penetration of water during showering.

Application of **Diapouch™**

Water repellent system
