

# Urinal Catheterization Trays

Catalog # 929/ \*

## Sterile

Designed for easy and aseptic insertion and maintenance of catheters.

Includes all necessary components for complete aseptic procedures as recommended by the C.D.C.

Trays and instruments are disposable and economical, eliminating risk of cross infection and processing for re-use.

Trays include syringe prefilled with sterile water and glycerin for catheter balloon inflating, and Flowclamp to control urine flow. Rigid compartment tray used as specimen container.

\* **Composition according to customer request**
