

# Dressing Tray for Dialysis (pre & post) Catalog # 923/D

**Optimum medical treatment for maximum patient-staff protection**

- A unique method for safe & effective procedures
- The sterile kit comprises all essential components necessary for pre and post dialysis dressing
- Prevents cross infection
- Cost-effective and time-saving
- Specially designed U - shaped plasters for needle fixation\*
- **Diapres™** haemostatic expanding adhesive tape\*
- Patented Pressure Armlet - providing unprecedented protection to prevent blood spurts and clotting

**Also includes:**

- 2 pairs. latex gloves
- Gauze pads/tupfers
- Sterile fields
- 4 additional adhesive strips\*
- \*All adhesive tapes are made of hyperallergic, water repellent air permeable elastic material. The glue on the tapes is applied in evenly distributed parallel lines, facilitating easy and painless removal.

U plaster & adhesive strips affix the **Butterfly®** needle.

Place the "bath shaped" block of the armlet over the center pad, and remove the needle.
